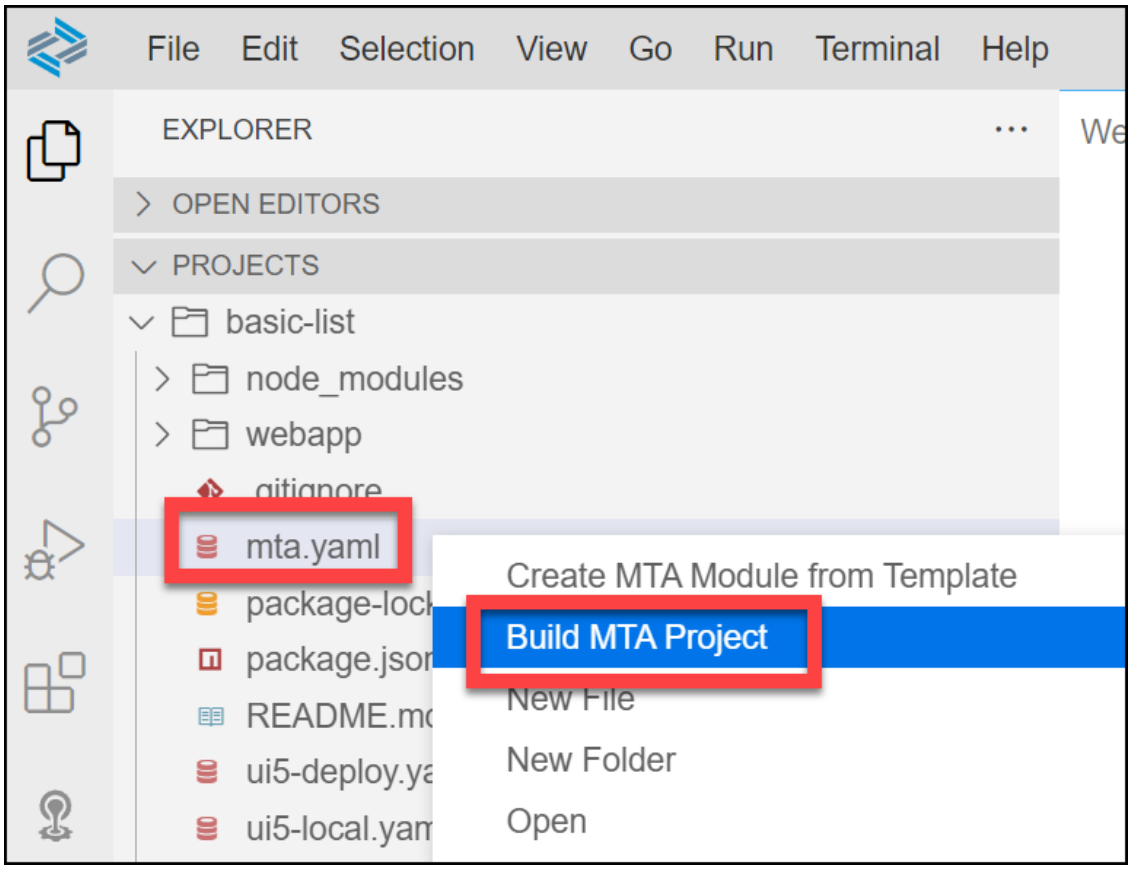
Build & Deploy Application and Configure Fiori Cloud Launchpad

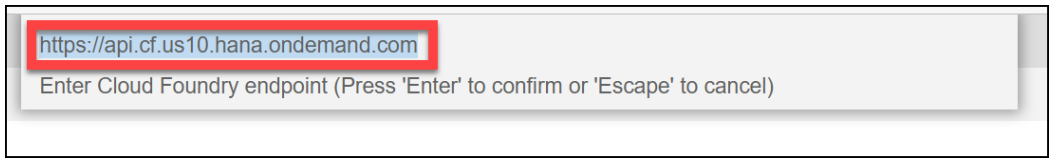
Build and Deploy

- Right click on the **mta.yaml** file and select *Build MTA Project*



This will start a terminal and it will create 3 new directories: *dist*, *mta_archives* and *resources*.

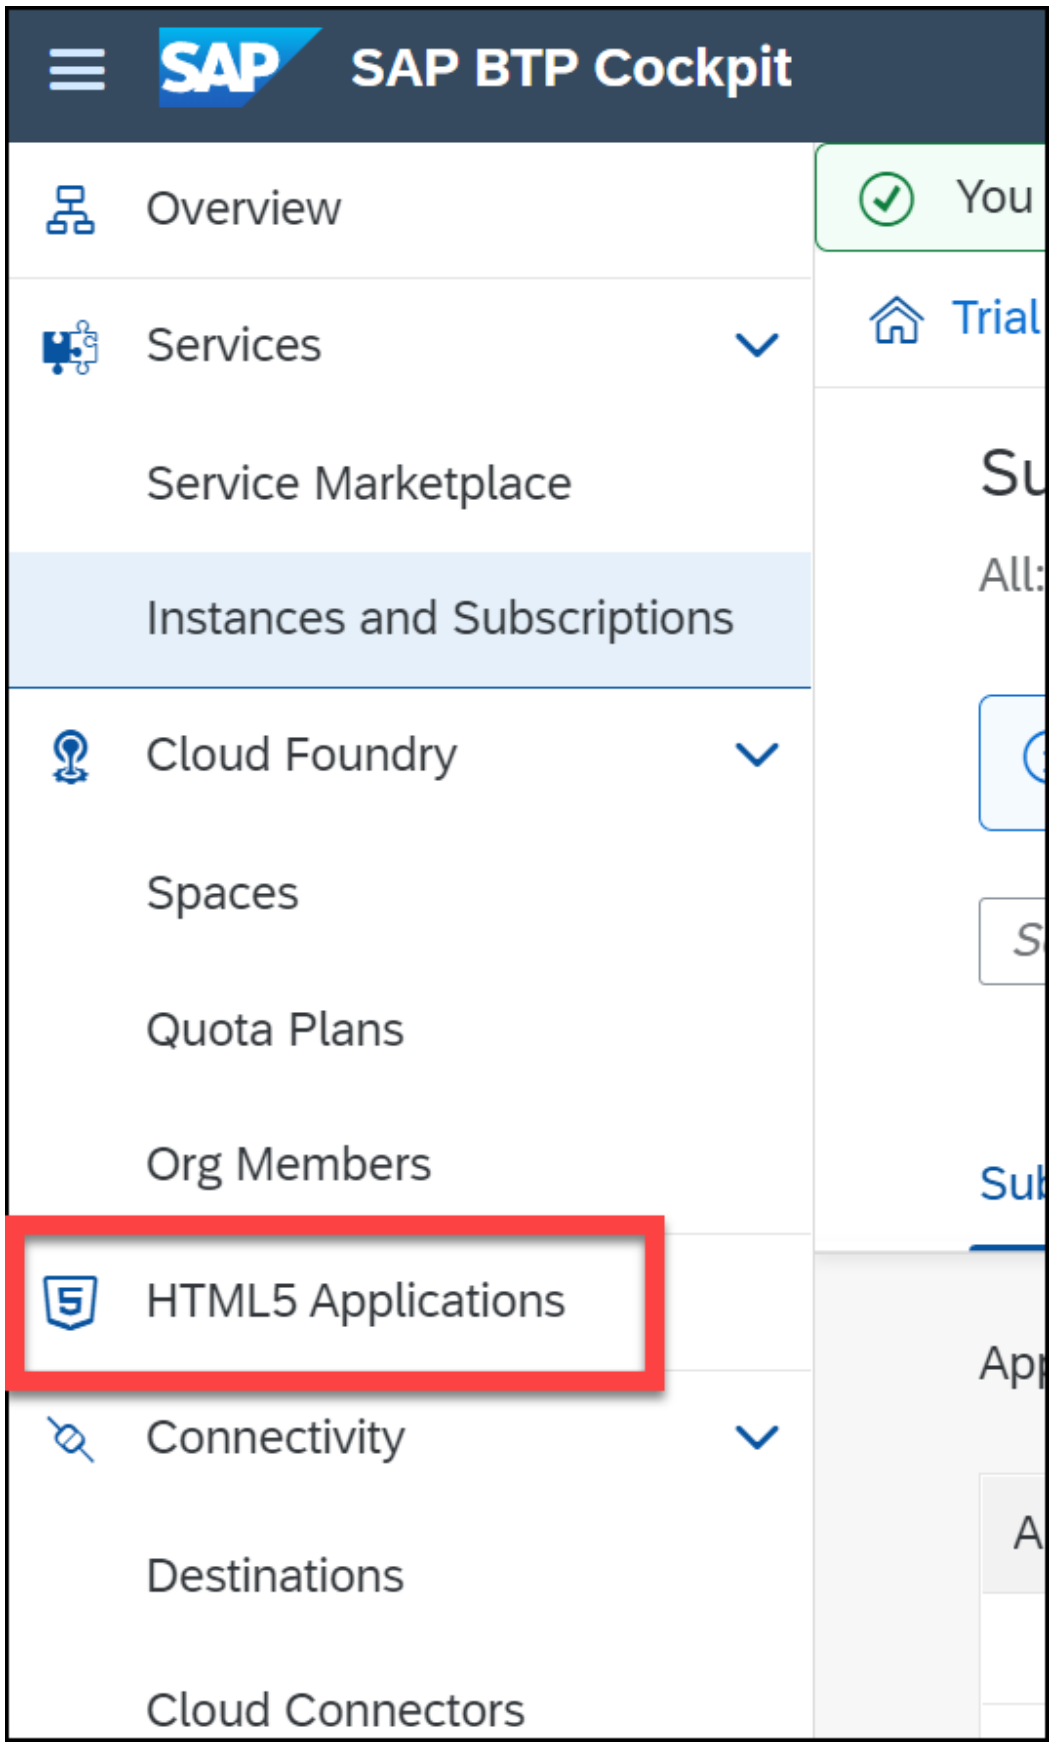
- Open the *mta_archives* folder and right click the **.mtar** file and select *Deploy MTA Archive*
- Check your Cloud Foundry Endpoint and press *Enter* to confirm.



- Enter your e-mail address and password of your trial account.
- Select your Organisation and Space

This will open another terminal that will deploy the **.mtar** to the cloud. This can take a moment.

- To see if all went well you can goto your SAP BTP Trial Cockpit and the option **HTML5 Applications** on the left side.



SAP BTP Cockpit
Overview
Services
Service Marketplace
Instances and Subscriptions

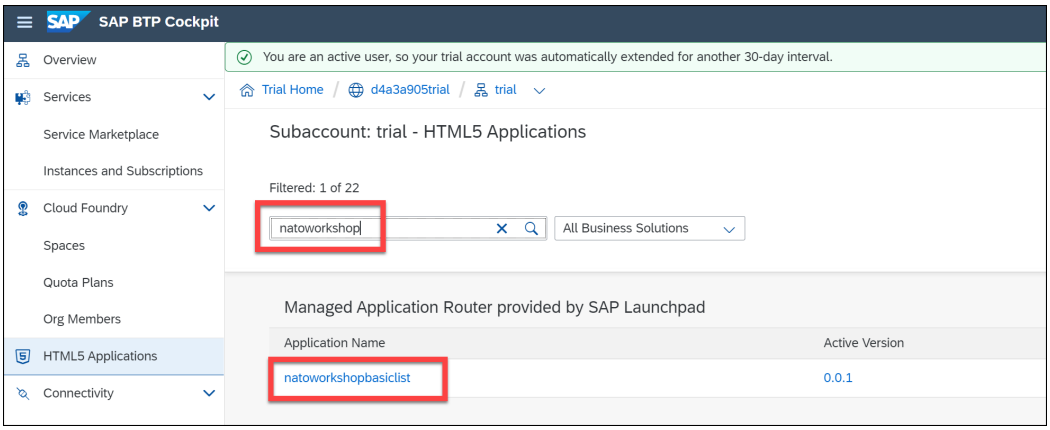
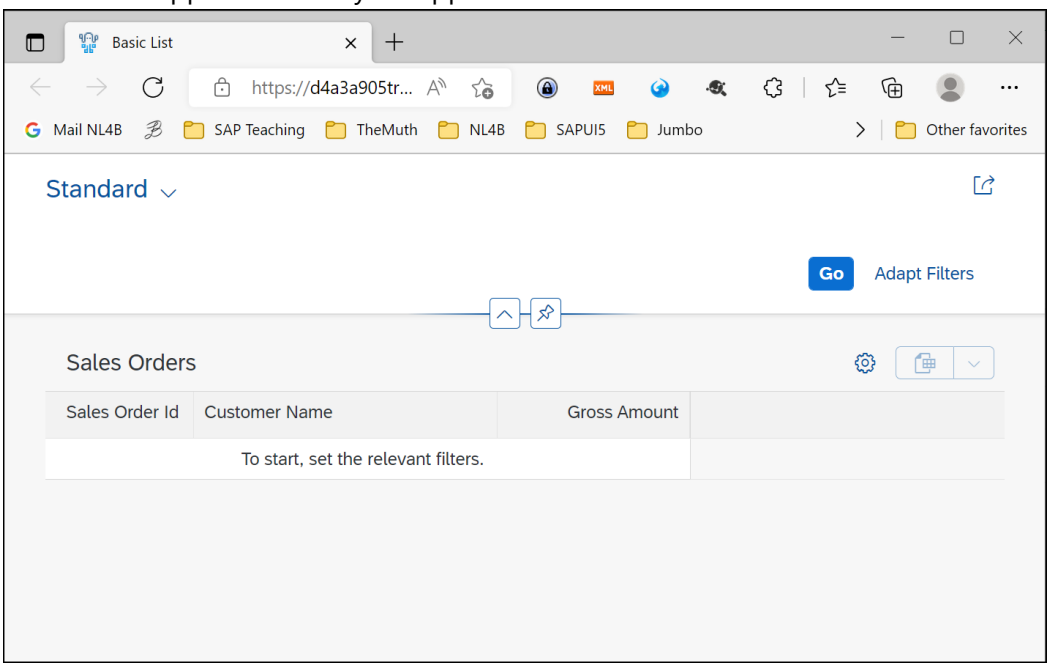
Cloud Connectors

- If you filter on *natoworkshop* you should see your application.

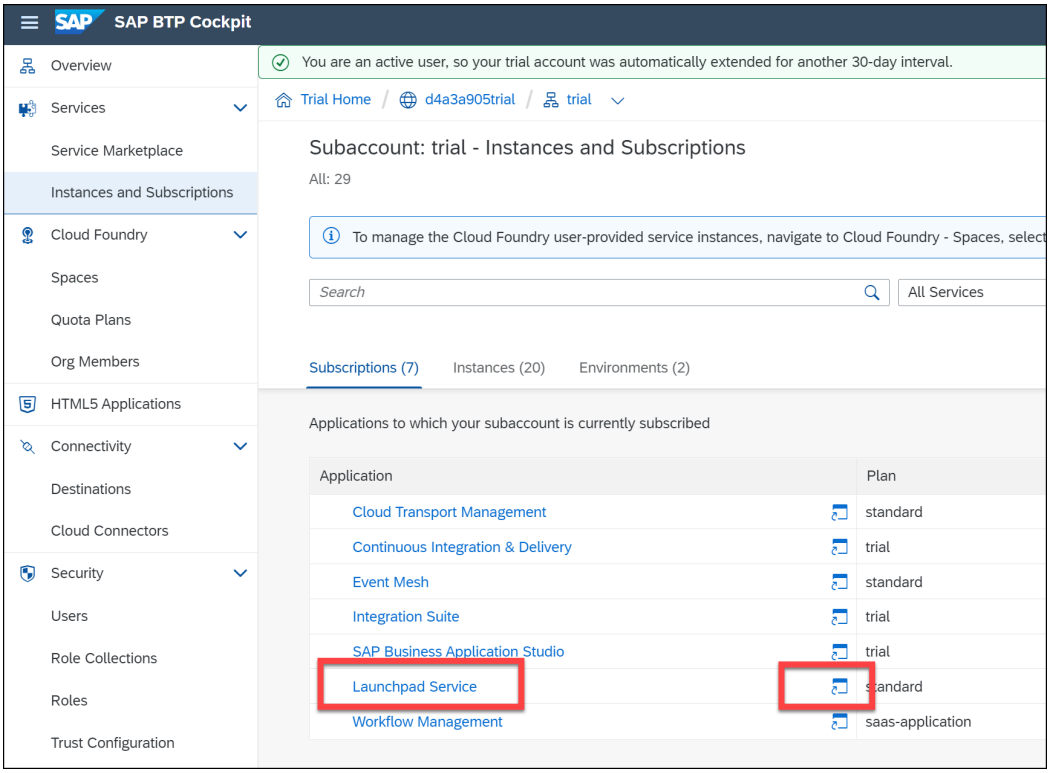


- Click on the application and your application will start.

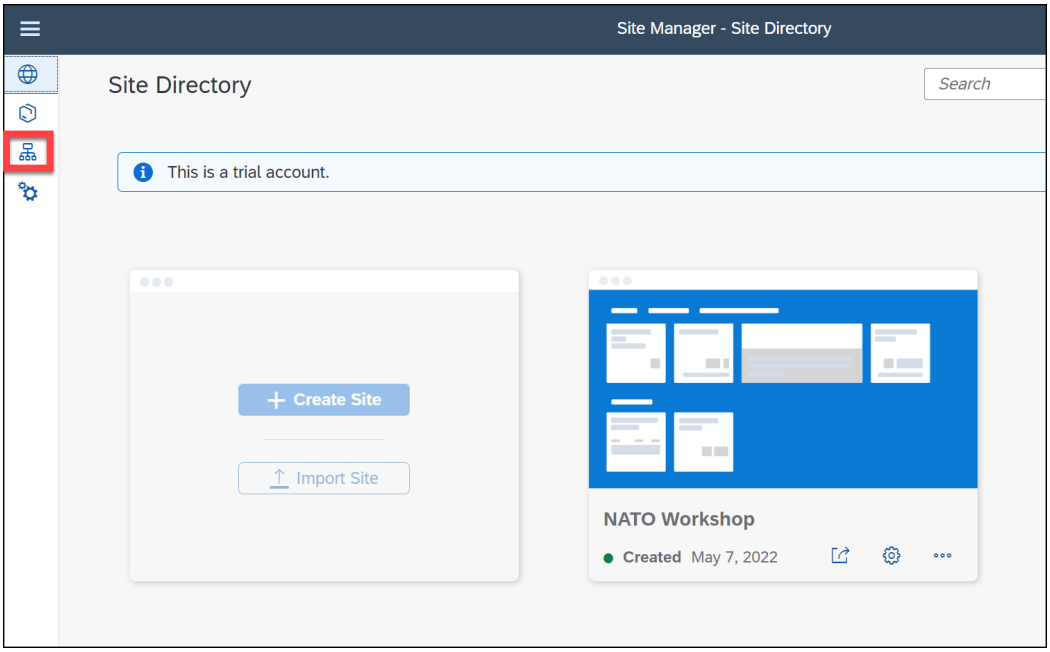


Configure Fiori Launchpad Cloud

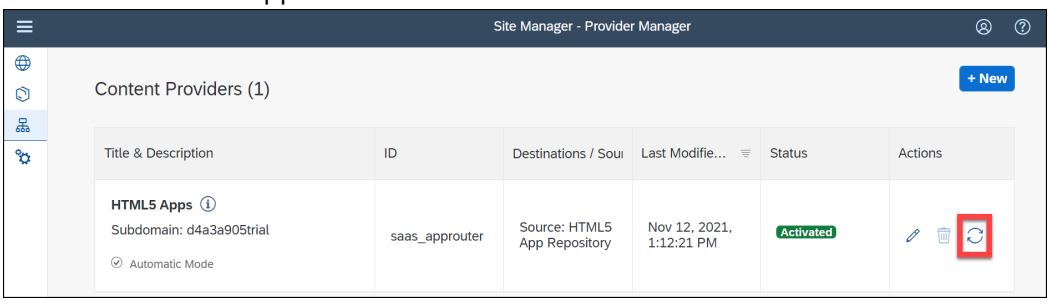
- Goto *Instances and Subscriptions* in your BTP Cockpit and goto the Launchpad Service



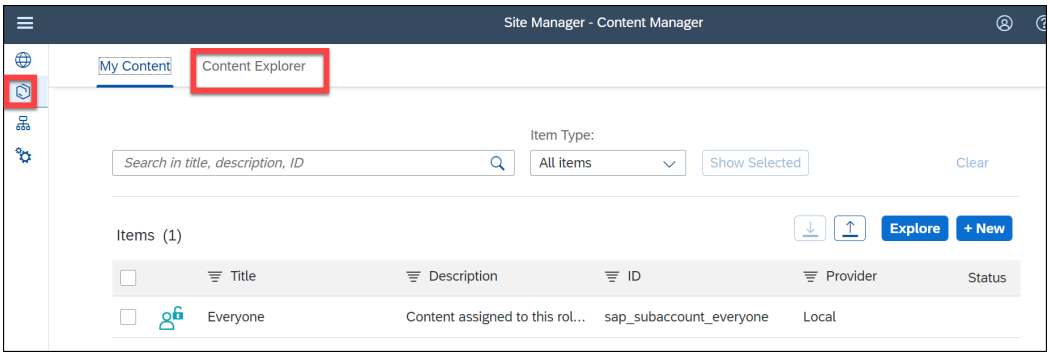
- In the Site Directory select the **provider manager**



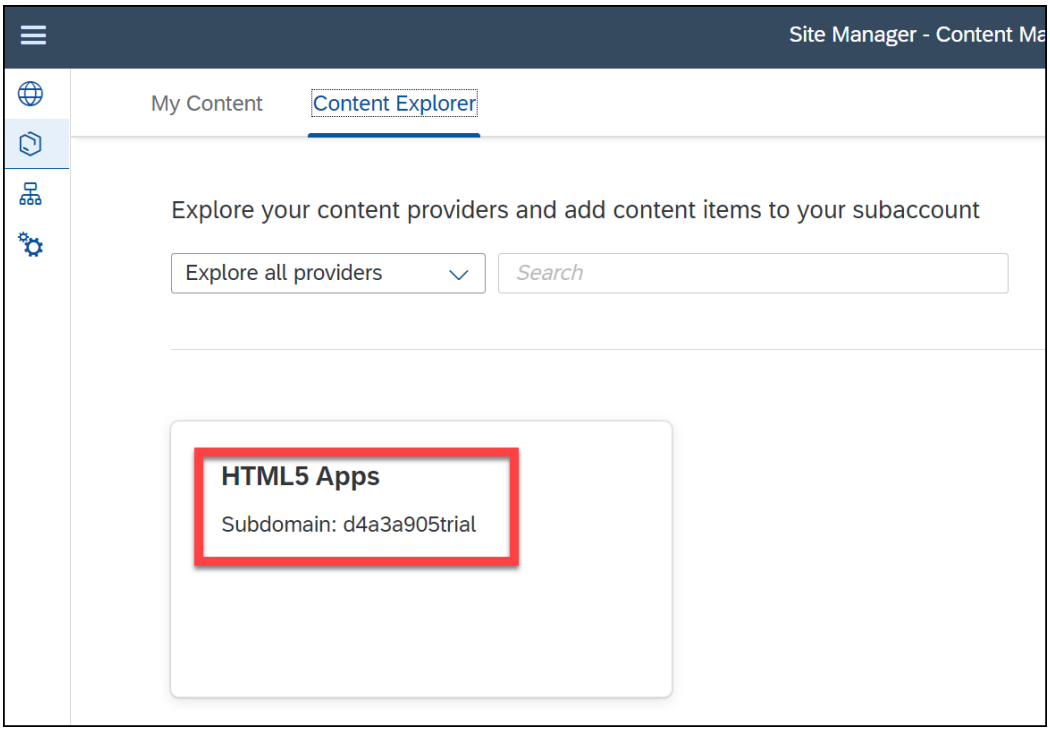
- Refresh the HTML5 Apps



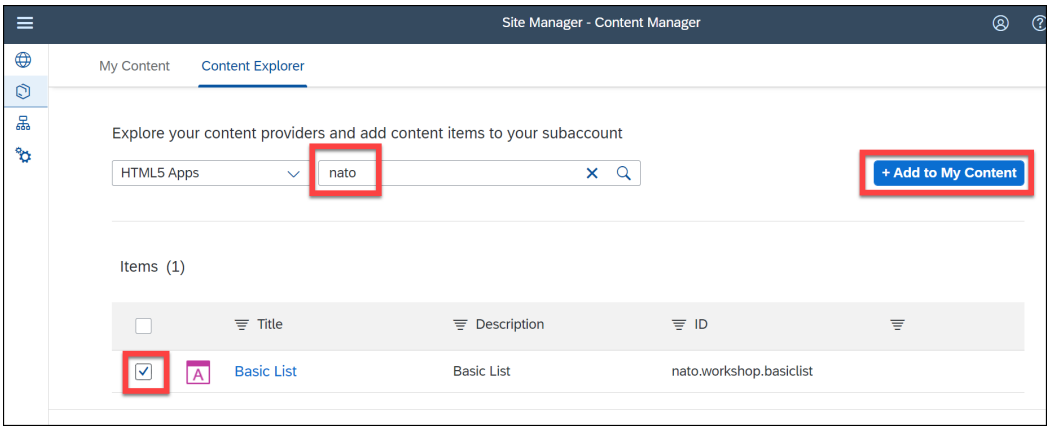
- Goto the **Content Manager** and click the tab *Content Explorer*



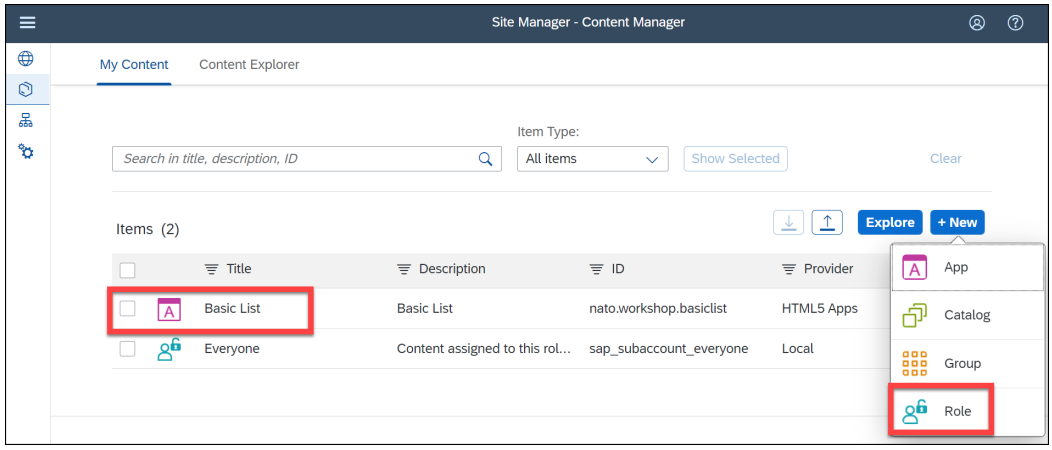
- Click the **HTML5 Apps**



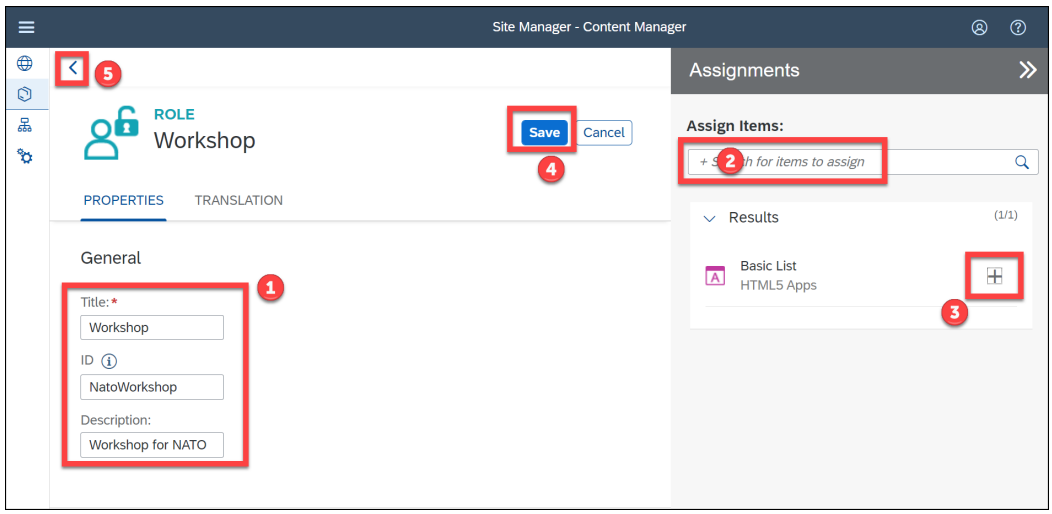
- User filter **nato** to list your **Basic List** application and add it to My Content



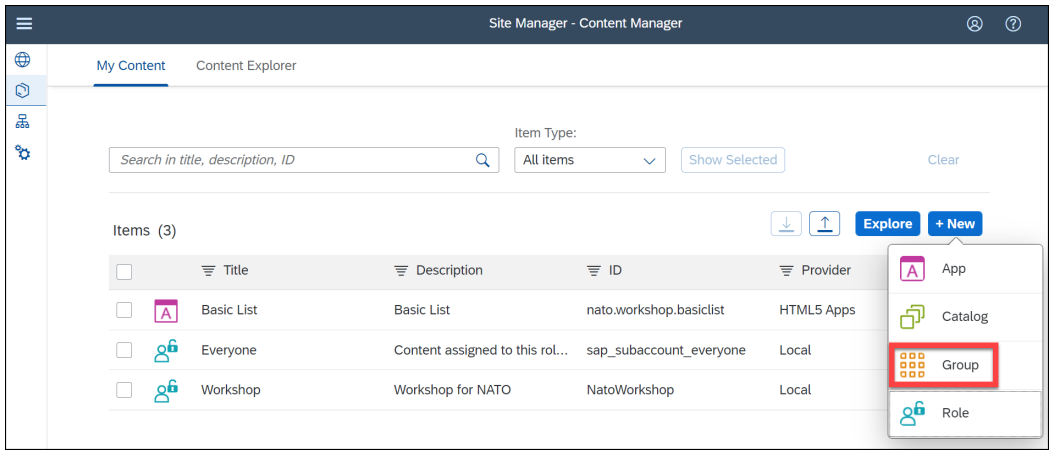
- Goto the tab *My Content*, here you see your **Basic List** application.
  Now lets create a Role.



- Enter the *Title*, *ID* and *Description*, then click on the search block under Assign Items:, you now see a your application. Press the + button behind your application, then *Save* and then *Back*

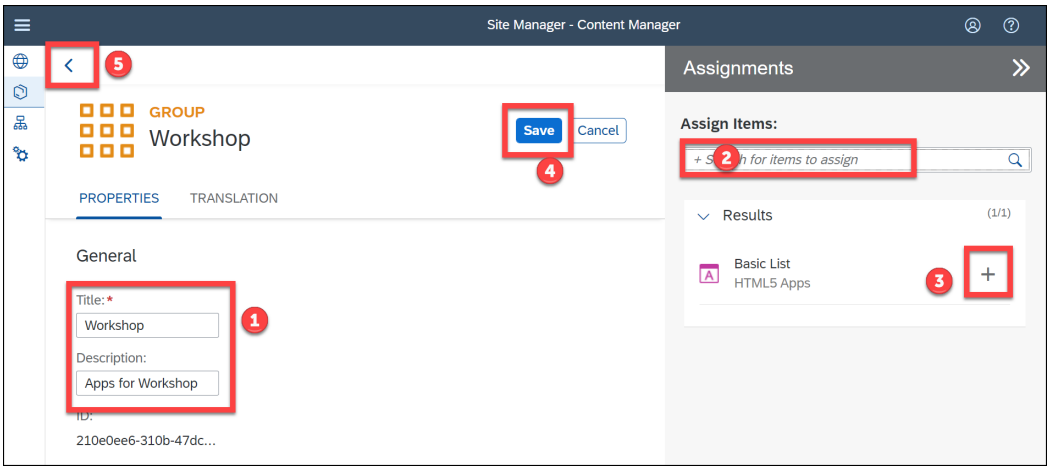


- We now have a new Role
  Now lets create a Group.

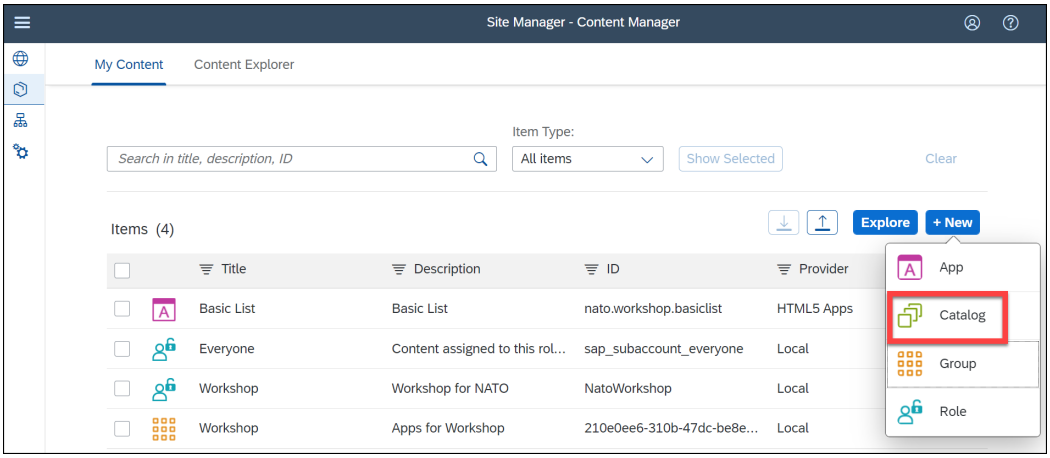


- Enter the *Title* and *Description*, then click on the search block under Assign Items:, you now see a your application. Press the + button behind your application, then

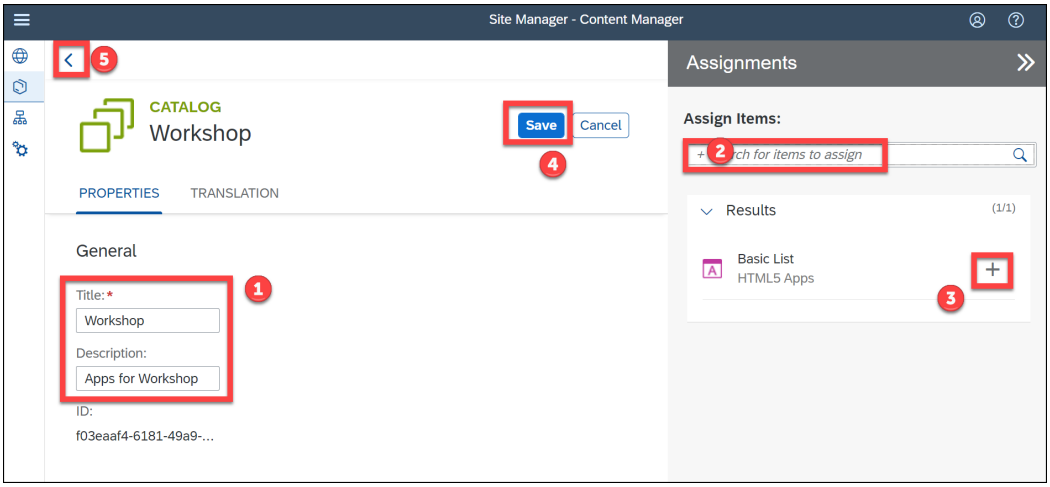
Save and then *Back*



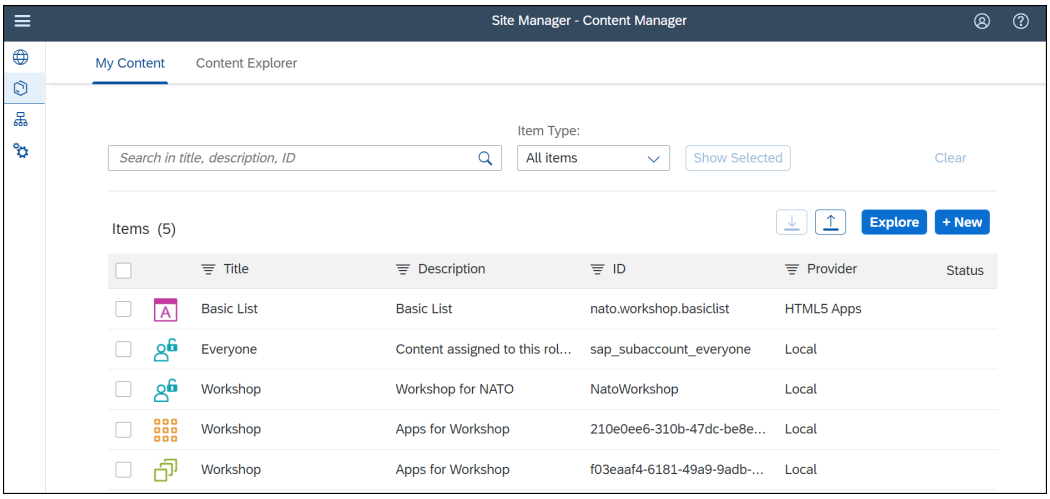
- We now have a new Group
  Now lets create a Catalog



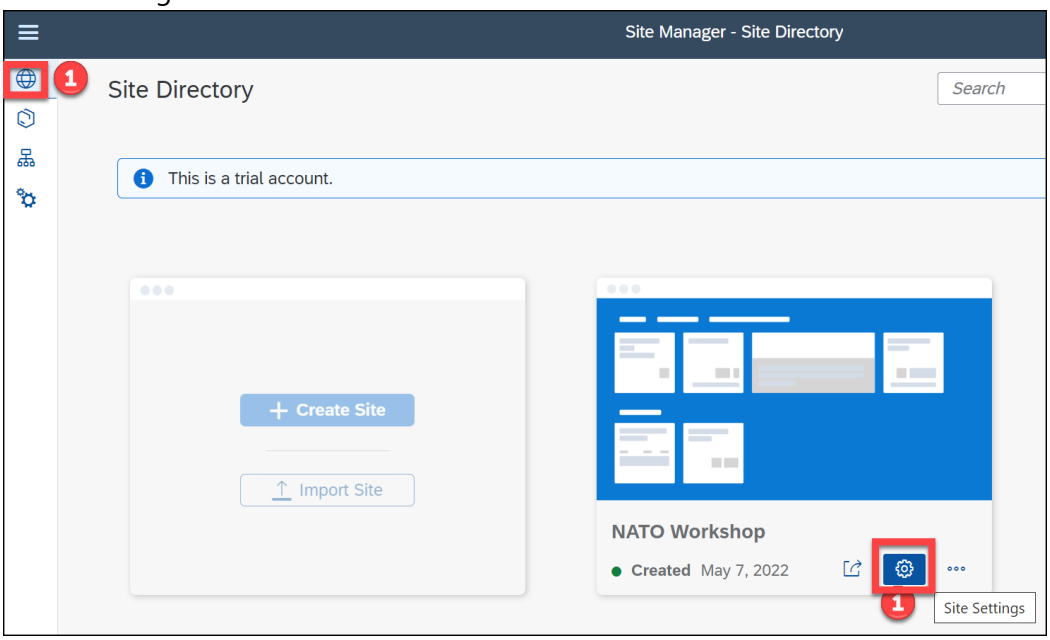
- Enter the *Title* and *Description*, then click on the search block under Assign Items:, you now see a your application. Press the + button behind your application, then *Save* and then *Back*!



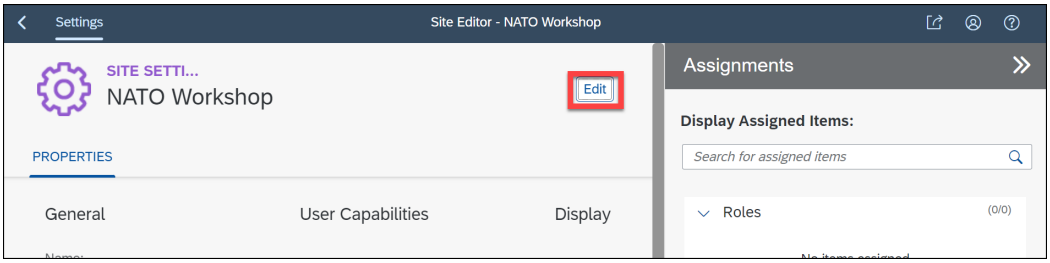
- We now have a new Catalog



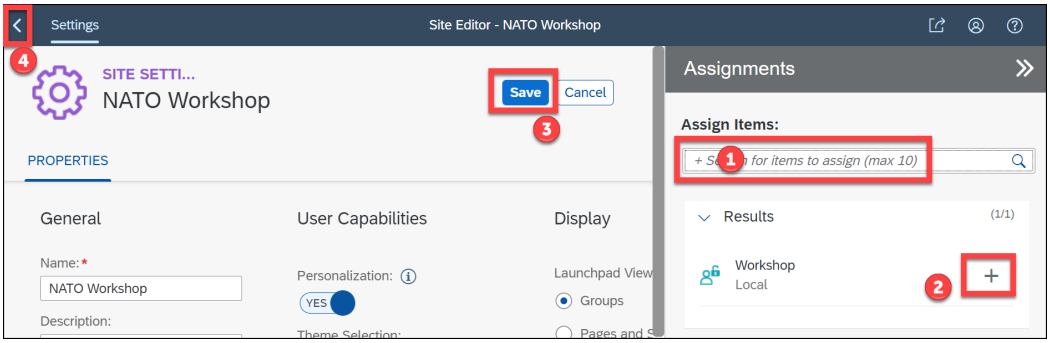
- Next we assign the created Role to our Site



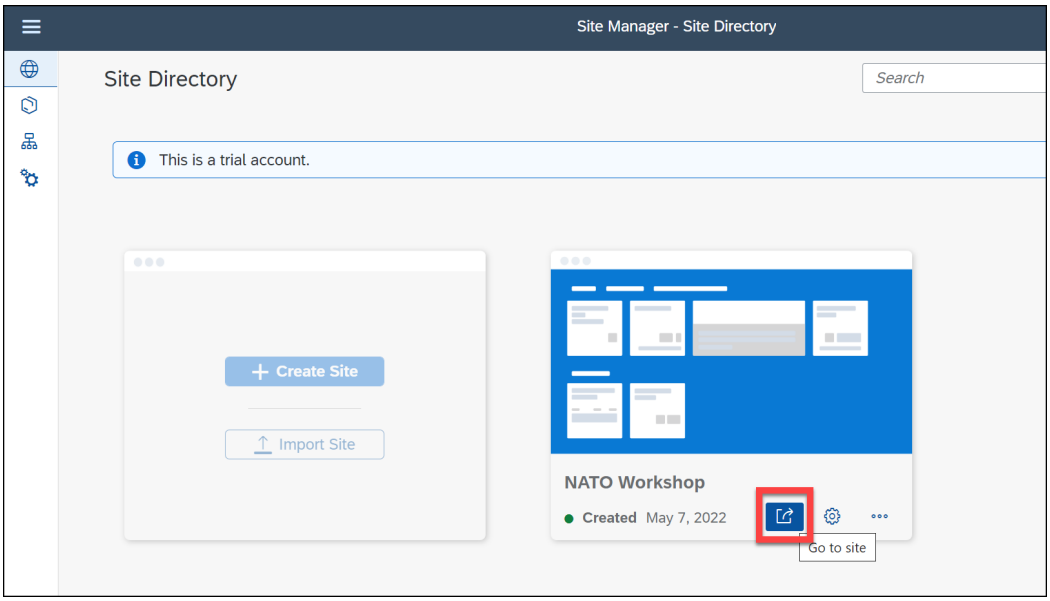
- We *Edit* the Site



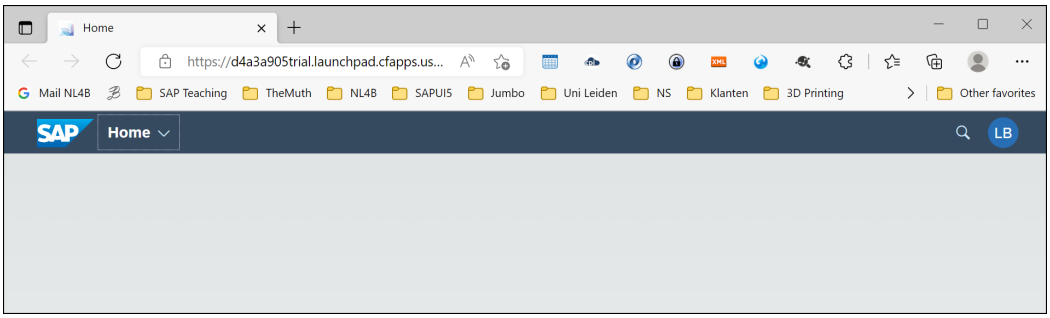
- Click on the search block under Assign Items:, you now see a your Role. Press the + button behind your role, then *Save* and then *Back*



- Goto the Site/Launchpad

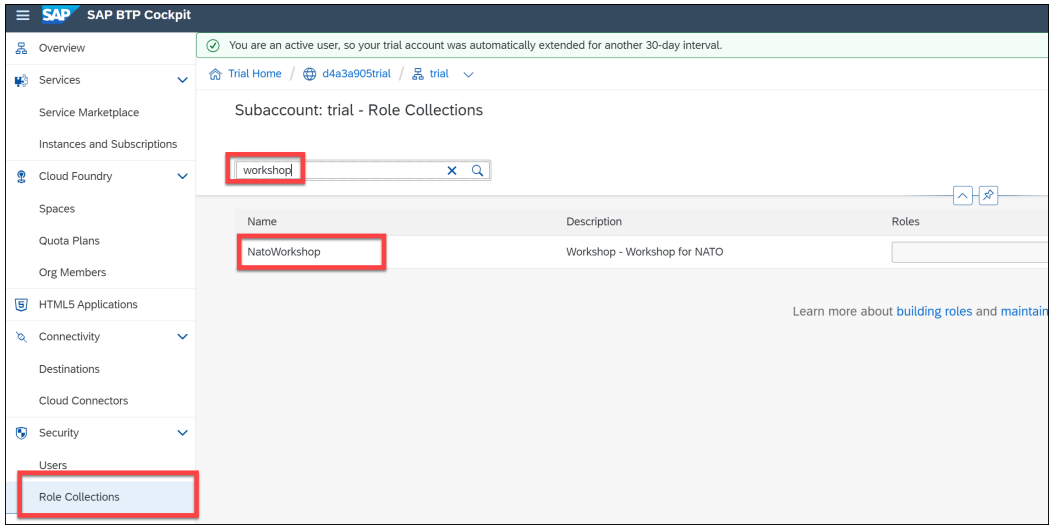


- Our Launchpad is still empty.

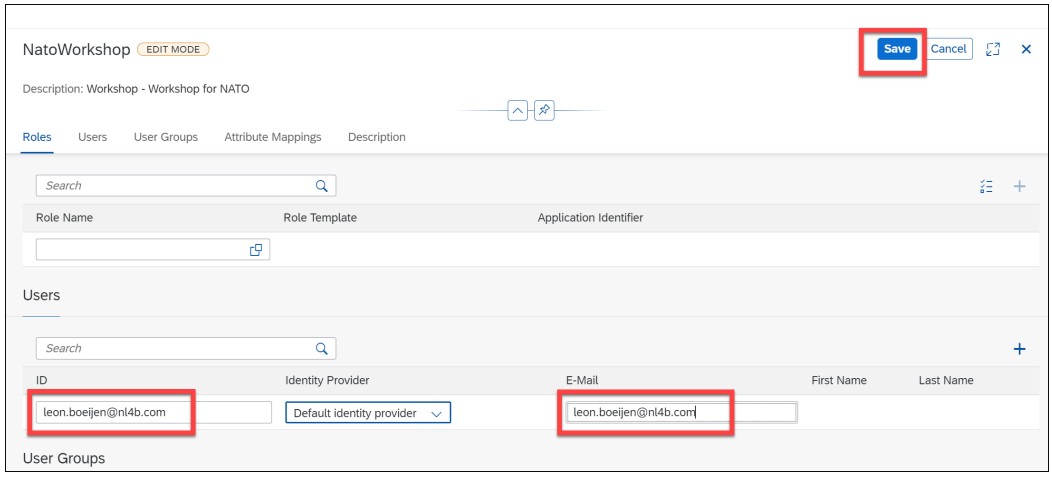


This is because we have not yet assigned the new Role to our user.

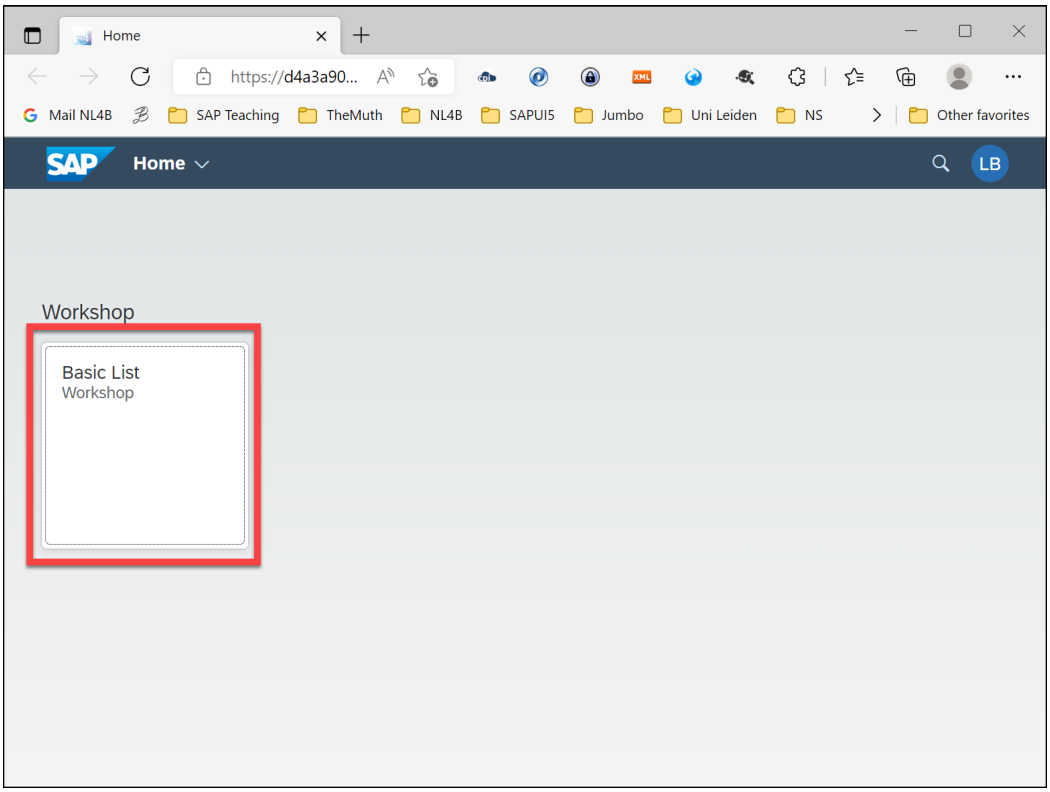
- Goto your BTP Cockpit and select *Role Collections*, Filter on **workshop** and click on your Role



- Goto *Edit* mode and enter your e-mail address of your trial account in the fields **ID** and **E-Mail** and press *Save*



- Now lets start our Launchpad again.



> Hint: it is sometimes needed to start a browser in *Private/Incognito mode* and lauch the Fiori Launchpad again, to make your changes available.
